

OSA 5556
Copy 5 of 6

MEMORANDUM FOR: Chief, Intelligence Division, OSA
Chief, Control Center, OSA

SUBJECT : Long Range Recon Program Far East

1. Please design and construct a status chart for permanent use in the Control Center, reflecting the forecast of desired operational missions in the Far East. As you know, this is a subject about which there has been much discussion and one on which the Intelligence Community has devoted considerable effort. Further, it is an ever changing situation and requires close monitoring and posting in order to keep users of such information current.

2. Once you have selected the format and arranged for the above chart's construction and display, it can be maintained by the Control Center personnel. However, like all other charts in the Control Center, the responsibility for insuring current information and general supervision must be placed with a primary interest Staff Office. I would like the Intelligence Division to assume responsibility for this chart.

25X1A

Deputy for Field Activities, OSA
